

PhosCera is made from only ceramic. That enables high power LED lights to perform high color rendering and long-term stability.

## [ Feature ]

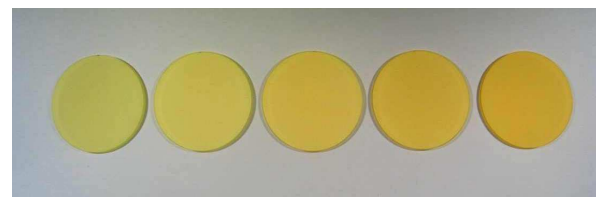

- High heat resistance** → Heat-resistant performance more than 500 degrees ※
- Light fastness** → Not deteriorate by lasers and ultraviolet
- High color rendering** → Sensitive phosphor are protected by ceramic layer
- Shape & size free** → Tailor designs to meet your requirements.

※ Heat-resistant temperature is different depending on phosphor

## [ Specification ]

Shape	dimension	CCT(K)	CRI	lm/W ※
Circle	φ 60 × 2t	3000	90	78
		3500	91	81
		4000	91	81
		5000	91	81
		5500	90	82

※ 10W, λ<sub>ex</sub> = 450nm
